Innovating to Learn, Learning to Innovate

B 361041

Centre for Educational Research and Innovation

Table of Contents

Executive Summary	11
Chapter 1. The Search for Innovative Learning Environments	
by Francisco Benavides, Hanna Dumont and David Istance (OECD Secretariat)	21
1.1. Introduction	21
1.2. Why looking for new learning approaches and environments?	22
Competences and PISA – the argument for more successful learning of wider competence sets	24
Learning sciences and contemporary societies and economies – the arguments for change.....	25
Schools as organisations – weak knowledge management and innovative capacity.....	27
1.3. Different approaches to re-designing learning environments	28
Building on learning science research.....	29
Comparing learning models and approaches.....	30
The lessons provided by “alternative schooling”	31
The inspiration of practice.....	33
Concrete innovative examples.....	34
1.4. Is reform for far-reaching change possible?.....	38
Flexibility as resilience.....	39
From education-focused to learning and innovation-driven reform.....	40
References.....	42
Chapter 2. Optimising Learning: Implications of Learning Sciences Research	
by R. Keith Sawyer.....	45
2.1. Introduction	45
2.2. The standard model of schooling	46
2.3. The shift to the innovation economy.....	47
2.4. Key learning sciences findings.....	50
The importance of deeper conceptual understanding	50
Focusing on learning in addition to teaching	52
Building on prior knowledge.....	52
Reflection	53
Scaffolding learning	53
2.5. Design principles from the learning sciences.....	54
Customised learning	54

Diverse knowledge sources	55
Distributed knowledge	55
Curriculum	56
The role of the teacher.....	57
Assessment.....	57
2.6. The learning sciences and alternative models of learning.....	58
2.7 Conclusion	60
References.....	62
Chapter 3. Toward Research-based Innovation	
by Carl Bereiter and Marlene Scardamalia.....	67
3.1. Dimensions of difference	70
Amount of direction: from instruction to epistemic agency.....	71
Emphasis on ideas versus activities.....	73
Individual versus community emphasis	76
“Design mode” versus “belief mode”.....	78
Accommodation to external constraints	79
3.2. Comparing learning models and approaches	80
<i>Annex 3.A.1: Educational Models and Approaches to Learning</i>	84
References.....	88
Chapter 4. The Contribution of Alternative Education	
by Anne Sliwka	93
4.1. Alternative education: a fragmented landscape.....	93
4.2. Global networks of alternative schools	95
4.3. Understanding the culture of learning in alternative forms of education	98
The conception of the learner	98
The learning environment	100
The role of teachers	102
Curricula and the content of learning	104
The function and culture of assessment.....	106
4.4. Alternative education in light of recent research in the learning sciences	107
References.....	109
Chapter 5. Situated Pedagogies, Curricular Justice and Democratic Teaching	
by Mar Rodriguez-Romero	113
5.1. Situated pedagogies and situated learning	115
5.2. Curricular justice.....	121
5.3. Democratic teaching and learning.....	126
5.4. Community construction and the educational professional	130
5.5. Conclusion	132
References.....	134

Chapter 6. The Construction of Learning Environments: Lessons from the Mexico Exploratory Phase

by **Juan Cassassus, María de Ibarrola, Lilia Pérez-Franco, Juana M. Sancho-Gil, Marcela Tovar-Gómez, Margarita Zorrilla** 137

6.1. Building appropriate education: an unachieved task.....	139
6.2. Needs and emotions as driving forces.....	142
6.3. Building a meaningful learning model.....	147
6.4. Finding routes for change.....	149
6.5. Looking for pertinent education responses	151
6.6. Reforms built from the field.....	155
References.....	157

Chapter 7. What Makes Innovations Work on the Ground?

by **María Cecilia Fierro-Evans** 161

7.1. Innovation as a managerial process.....	161
7.2. Features of innovation: building the intervention model	163
Design and growth path.....	163
The agent and the change process	164
Types of intervention	165
7.3. Strengths found in the cases' origins and operations	165
7.4. Innovation targets and their action spaces: agents and the political processes	167
Rationale and legitimacy of the proposal.....	167
Political conditions: willingness and reality.....	167
7.5. Real room for conflict management and for different actors to make decisions	168
Consistency between aims and contents and decision making.....	169
7.6. Attitudes that foster innovations	170
References.....	172

Chapter 8. The Dynamics of Innovation: Why Does it Survive and What Makes it Function

by **Inés Aguerrondo**..... 175

8.1. Existing pressures	177
8.2. Gaps requiring innovation (or “the window of opportunity”).....	178
Conditions of the structure	178
Conditions of the current situation	179
8.3. Development of the proposal, preparation and participation	180
8.4. The politico-cultural feasibility.....	182
8.5. The feasibility of knowledge.....	183
The scientific-professional dimension.....	183
The organisational-administrative dimension	183
8.6. Concrete feasibility and resources available	184
8.7. The role of general context and background.....	186

8.8. Available courses of action 187

8.9. The process of consolidation..... 188

 Appropriate atmosphere for innovation..... 189

 Flexibility in the development of innovation 190

8.10. Functionality of the innovation 192

8.11. The open roads (sustainability) 194

 Responding to changes in context and avoiding the onset of routine..... 194

 Reacting to the pressure of institutionalisation 195

 The challenge of expansion..... 196

8.12. A new paradigm: under construction? 197

8.13. Organisation of the administration 199

8.14. Transition towards generalisation (or the vicious circle of the “two sets of logic”)..... 200

References..... 202

Chapter 9. Open Learning: A Systems-driven Model of Innovation for Education
by Tom Bentley..... 205

9.1. Introduction..... 205

9.2. Multiple dimensions..... 207

9.3. Creating human capital: a new global narrative for schooling? 209

9.4. The dominance of the bureaucratic paradigm 213

9.5. Why are bureaucratic models so resilient?..... 214

9.6. Liberalisation and specialisation: responses to rising demand..... 219

9.7. Innovation through collaboration: learning from open systems..... 222

References..... 229

Annex A. Summaries of the Four Mexican Case Studies..... 231

Case Study 1: The Cerro del Judío Friendship Centre 234

Case Study 2: Regular Education Support Services Unit – USAER 8..... 240

Case Study 3: Intelligent Classroom for Migrants 245

Case Study 4: Ayuujk Polyvalent Integral Community High School – BICAP.. 252
